## Course Outline

### Advanced Navigation

#### Advanced Navigation

Advanced navigation techniques

#### Fill Review

Review of Autofill conventions and techniques

### Cell Management

#### Advanced Cell Locking

Create powerful formulas by locking either the column or the row

#### Hot Keys

Transform the ribbon into a visual listing of pre-assigned shortcuts

#### Cell Auditing

Observe the relationship between formulas and cells

#### Go To Special

Quickly select cells that meet certain criteria

### Special Formatting

#### Conditional Formatting-Formulas

Create custom rules for Conditional Formatting with formulas

#### Date Functions

Calculate dates with a variety of functions

#### Custom Number Formats

Customize number formats to meet specific requirements

## Advanced Functions

### Nested IF statements

Nested "IF" statements allow for more than just two possibilities in a single cell

### IF statements with AND/OR

Expand the functionality of the IF function by adding an AND / OR criteria

## What If Analysis

### Goal Seek

Find the desired result by adjusting an input value

### Data Tables

Data Tables show the range of effects of one or two different variables on a formula

## Advanced Analytical Tools

### Calculation Options

Minimize volatility by changing calculation options

### Conditional SumProduct

Use SumProduct with conditions to exclude data that does not meet certain criteria

### Pivot Table-Base Fields & Sets

Analyze data in a Pivot Table with increased granularity by defining base fields and sets

### Pivot Table-Calculations

Create calculated rows or columns in a Pivot Table that go beyond the source data

### Pivot Charts

Create dynamic, graphical representations of Pivot Table data

## Advanced Database Functions

### XMATCH function

Return the relative position (column or row number) of a lookup value

### INDEX-MATCH

Efficiently return a value or reference from a cell at the intersection of the row and column

### INDEX-Double MATCH

Use a second Match function to create a powerful, two-way lookup tool

## Introduction to Macros

### Recording Macros

Record macros that involve formatting and calculations

## **Dynamic Arrays**

### **Dynamic Arrays**

Use formulas that can return arrays of variable size

## **End of Class Projects**

### **Projects**

End of class project to review key concepts from the class
